Industries:

1. Food Industry
2. Medical / Pharmaceutical
3. Electronics Manufacturing
4. Electrical Equipment
5. Bio Fertilizers / Agriculture
6. Steel / Iron Industry
7. Rubber & Plastic
8. Glass Industry

Roles:

Super Admin, HR Manager ,Production Manager, Quality Manager, Maintenance Manager, Inventory/Store Manager, Procurement/Supply Chain Manager, Finance Manager, Safety Officer (EHS), Supervisor / Team Lead, Worker / Employee, Sales Manager

Features:

🏢 1. SUPER ADMIN (System Owner)

🎯 Responsibility:

Controls entire company system

✅ Features:

Company setup & configuration

Add/Edit/Delete users

Assign roles & permissions

View all modules (HR, ERP, CRM)

Subscription & billing (trial, upgrade)

Global reports (company-wide insights)

Multi-location / branch management

👔 2. HR MANAGER (HRMS Core)

🎯 Responsibility:

Manage employees

✅ Features:

Employee onboarding & profiles

Attendance tracking

Leave management & approvals

Payroll overview (high-level)

Employee performance tracking

HR reports & analytics

Document management (ID, contracts)

🏭 3. PRODUCTION MANAGER (ERP Core)

🎯 Responsibility:

Control manufacturing operations

✅ Features:

Production planning & scheduling

Work order creation

Track production progress

Machine allocation

Daily production reports

Output vs target tracking

🔍 4. QUALITY MANAGER

🎯 Responsibility:

Ensure product quality

✅ Features:

Quality inspection records

Defect tracking

Batch quality status

Compliance tracking

Audit logs & reports

Approval/rejection workflows

🔧 5. MAINTENANCE MANAGER

🎯 Responsibility:

Machine health & uptime

✅ Features:

Machine maintenance schedules

Breakdown tracking

Service history

Spare parts tracking

Maintenance requests (from workers)

Alerts for upcoming maintenance

📦 6. INVENTORY / STORE MANAGER

🎯 Responsibility:

Manage stock & warehouse

✅ Features:

Stock tracking (in/out)

Warehouse management

Low stock alerts

Batch/lot tracking

Goods receipt & dispatch

Inventory reports

🚚 7. PROCUREMENT / SUPPLY CHAIN MANAGER

🎯 Responsibility:

Handle suppliers & purchasing

✅ Features:

Supplier management

Purchase order creation

Material requirement planning

Vendor comparison

Order tracking

Procurement reports

💰 8. FINANCE MANAGER

🎯 Responsibility:

Manage money & transactions

✅ Features:

Invoices & billing

Expense tracking

Payment tracking

Financial reports

Profit/Loss overview

Budget management

⚠️ 9. SAFETY OFFICER (EHS)

🎯 Responsibility:

Ensure workplace safety

✅ Features:

Safety incident reporting

Risk assessments

Compliance tracking

Safety audits

Training records

Alerts & violations

👮‍♂️ 10. SUPERVISOR / TEAM LEAD

🎯 Responsibility:

Manage workers daily

✅ Features:

Assign tasks to workers

Track team performance

Monitor attendance

Daily activity reports

Escalate issues

Approve small requests

👷 11. WORKER / EMPLOYEE

🎯 Responsibility:

Execute tasks

✅ Features:

View assigned tasks

Mark work progress

Apply leave

Check attendance

Submit issues (machine/problem)

View salary/basic info

📈 12. SALES MANAGER (CRM Core)

🎯 Responsibility:

Handle customers & revenue

✅ Features:

Lead management

Customer database

Sales pipeline tracking

Deal management

Quotation & orders

Sales analytics

Industry + Roles = Featutes:

🏭 **1. FOOD INDUSTRY**

👩‍💼 **HR Manager**

Manage factory workers (shift-based)

Track attendance (daily labor)

Handle leave & replacements

Maintain worker documents

🏭 **Production Manager**

Plan daily food production (batches)

Manage recipes & quantities

Assign workers to production lines

Track output (how many units produced)

🔍 **Quality Manager**

Check food safety (hygiene)

Inspect batches before packing

Reject spoiled/defective items

Maintain quality logs

📦 **Inventory Manager**

Track raw materials (rice, oil, etc.)

Monitor expiry dates

Manage storage (cold/dry)

Handle stock in/out

🚚 **Procurement Manager**

Purchase raw materials

Manage suppliers (farmers/vendors)

Compare prices

Track deliveries

💰 **Finance Manager**

Track production cost

Handle invoices

Monitor profit/loss

Manage payments

⚠️ **Safety Officer**

Ensure hygiene rules

Check worker safety

Handle food safety audits

👮‍♀️ **Supervisor**

Manage daily workers

Ensure production targets

Report issues

👷 **Worker**

Prepare food

Operate machines

Follow instructions

📈 **Sales Manager**

Handle orders (retail/wholesale)

Manage customers

Track sales

💊 **2. PHARMACEUTICAL INDUSTRY**

👩‍💼 **HR Manager**

Manage skilled employees

Handle compliance documents

🏭 **Production Manager**

Control medicine production

Follow strict formulas

Manage batch processing

🔍 **Quality Manager (MOST IMPORTANT)**

Test medicines

Approve/reject batches

Maintain compliance logs

📦 **Inventory Manager**

Track chemicals & materials

Maintain batch traceability

🚚 **Procurement Manager**

Source certified suppliers

Ensure quality materials

💰 **Finance Manager**

Cost tracking

Compliance expenses

⚠️ **Safety Officer**

Chemical safety

Lab safety

👮‍♀️ **Supervisor**

Monitor lab/workflow

👷 **Worker**

Operate machines/labs

📈 **Sales Manager**

Distribute medicines

Manage hospitals/pharmacies

⚡ **3. ELECTRONICS MANUFACTURING**

👩‍💼 **HR Manager**

Manage skilled technicians

🏭 **Production Manager**

Manage assembly lines

Plan production schedules

🔍 **Quality Manager**

Check product defects

Test circuits/devices

📦 **Inventory Manager**

Track components (chips, wires)

🚚 **Procurement Manager**

Purchase electronic parts

💰 **Finance Manager**

Track manufacturing cost

🔧 **Maintenance Manager**

Maintain machines

👮 **Supervisor**

Manage assembly workers

👷 **Worker**

Assemble products

📈 **Sales Manager**

Sell electronics

🌾 **4. AGRICULTURE / BIO FERTILIZER**

👩‍💼 **HR Manager**

Manage field workers

🏭 **Production Manager**

Manage fertilizer production

🔍 **Quality Manager**

Test fertilizer quality

📦 **Inventory Manager**

Track raw materials

🚚 **Procurement Manager**

Source organic inputs

💰 **Finance Manager**

Track seasonal costs

⚠️ **Safety Officer**

Handle chemical safety

👮 **Supervisor**

Monitor field/lab work

👷 **Worker**

Field/lab operations

📈 **Sales Manager**

Sell to farmers

🏭 **5. STEEL / IRON INDUSTRY**

👩‍💼 **HR Manager**

Manage heavy workforce

🏭 **Production Manager**

Control furnace operations

🔍 **Quality Manager**

Test metal quality

🔧 **Maintenance Manager (VERY IMPORTANT)**

Maintain heavy machines

📦 **Inventory Manager**

Track raw materials

🚚 **Procurement Manager**

Source materials

💰 **Finance Manager**

Track large-scale costs

⚠️ **Safety Officer (CRITICAL)**

Ensure worker safety

👮 **Supervisor**

Manage shifts

👷 **Worker**

Operate machines

📈 **Sales Manager**

Handle bulk orders

🧪 6. RUBBER / PLASTIC / GLASS

👩‍💼 **HR Manager**

Manage factory workers

🏭 **Production Manager**

Control molding/processing

🔍 **Quality Manager**

Check defects

🔧 **Maintenance Manager**

Maintain machines

📦 **Inventory Manager**

Track materials

🚚 **Procurement Manager**

Purchase raw materials

💰 **Finance Manager**

Cost tracking

⚠️ **Safety Officer**

Handle heat/process safety

👮 **Supervisor**

Monitor operations

👷 **Worker**

Operate machines

📈 **Sales Manager**

Sell products

Intitutes

👩‍💼 1. ROLES IN COACHING INSTITUTE SYSTEM

🔑 Core Roles

Super Admin (Owner / Director)

Admin / Branch Manager

HR Manager

Faculty / Trainer

Student

Parent (optional but powerful)

Sales / Admission Counselor

Accountant / Finance Manager

Operations / Coordinator

🧩 2. SYSTEM MODULE STRUCTURE

🔹 HRMS (Staff Management)

Employee lifecycle

Attendance & payroll

Performance tracking

🔹 CRM (Leads & Admissions)

Lead capture

Follow-ups

Conversions (enrollment)

🔹 ERP (Institute Operations)

Courses, batches, fees

Exams, results

Inventory, classrooms

👑 3. ROLE-WISE FEATURES (DETAILED)

🔴 SUPER ADMIN (OWNER / DIRECTOR)

👉 Full control of system

Features:

Create/manage branches

Add/remove all users (HR, faculty, etc.)

Dashboard:

Total students

Revenue

Conversion rate

Reports:

Profit & loss

Batch performance

Set permissions (RBAC)

Multi-branch monitoring

System configuration

🟠 ADMIN / BRANCH MANAGER

👉 Runs daily operations

Features:

Manage batches & schedules

Assign faculty to classes

Monitor attendance (students & staff)

Handle complaints/issues

Classroom allocation

Daily reports

🟡 **HR MANAGER (HRMS)**

👉 Staff-focused

Features:

Employee onboarding

Attendance tracking (biometric/manual)

Leave management

Payroll processing

Salary slips generation

Performance reviews

Document management (ID proofs, contracts)

🟢 **FACULTY / TRAINER**

👉 Teaching role

Features:

View assigned batches

Take attendance (students)

Upload:

Notes

Assignments

Conduct exams/tests

Enter marks/results

Track student performance

Live/online class integration

🔵 **STUDENT**

👉 End user (very important UX)

Features:

View enrolled courses

Class schedule

Attendance %

Download notes/materials

Submit assignments

View results

Fee payment status

Online payment option

🟣 **PARENT (Optional but HIGH VALUE)**

👉 Especially for school-level coaching

Features:

Track student attendance

View performance

Fee reminders

Notifications

🟤 **SALES / ADMISSION COUNSELOR (CRM)**

👉 Converts leads → students

Features:

Lead capture:

Website

Walk-ins

Calls

Lead pipeline:

New → Contacted → Interested → Converted

Follow-up reminders

Call notes

Demo scheduling

Conversion tracking

WhatsApp/SMS integration

🔵 **ACCOUNTANT / FINANCE**

👉 Money management

Features:

Fee collection

Invoice generation

Discounts/scholarships

Expense tracking

Salary processing

Financial reports

GST support (India)

⚪ **OPERATIONS / COORDINATOR**

👉 Smooth daily flow

Features:

Batch scheduling

Resource allocation (rooms, labs)

Event/exam coordination

Student queries handling

Notifications

🚀 **5. ADVANCED FEATURES (TO MAKE YOUR PRODUCT POWERFUL)**

🔥 **Smart Features**

AI-based student performance prediction

Attendance alerts (low attendance warning)

Auto fee reminders (WhatsApp/SMS)

📊 **Analytics Dashboard**

Conversion rate (CRM)

Top performing faculty

Course popularity

📱 **Mobile App (VERY IMPORTANT)**

Student app

Faculty app

Parent app

🌐 Integrations

Payment gateway (Razorpay/Stripe)

Zoom/Google Meet (online classes)

WhatsApp API

🔐 Security

Role-based access control (RBAC)

Data encryption

Audit logs

📐 6. TECH ARCHITECTURE (SUGGESTION)

Since you're already learning:

Frontend:

React.js (Dashboard + Apps)

Backend:

Node.js + Express OR Spring Boot

Database:

MySQL / PostgreSQL

Real-time:

Socket.io (chat, notifications)

🎯 FINAL THOUGHT

This is not just a project—this can become a real SaaS product for coaching institutes.

If you build it properly, you are essentially creating a competitor to:

Zoho CRM + ERP

Teachmint

Classplus
