Engineering Distributor Management Platform

By:
Zaltix Soft Solutions Pvt Ltd.

CONFIDENTIAL | FOR AUTHORIZED RECIPIENTS ONLY

THE PROBLEM

Generic CRMs Were Not Built for Engineering Distributors

No DRF Intelligence

Standard CRMs have no concept of Distributor Request Forms, versioning, or OEM approval workflows — the backbone of engineering sales.

Disconnected License Lifecycle

Installation tracking, license version management, and renewal alerts exist in no off-the-shelf CRM without heavy customization.

Engineer Payroll Blind Spots

HR tools treat all employees equally. Engineering firms need payroll tied to field installations, incentive structures, and support ticket resolution.

Siloed Financial Reporting

Revenue, outstanding invoices, and overdue tracking require different tools that don't speak to each other — leading to manual reconciliation and errors.

The result: Engineering distributors end up paying for software that requires expensive customization to barely meet 80% of their needs.

OUR SOLUTION

23 Modules - One Unified Platform

CRM MODULE

Lead & Contact Management
DRF Management + Versioning
Sales Pipeline Tracking
Follow-ups & Tasks
Quotation & Proposal
Purchase Order Management
Customer / Account Mgmt
Installation + License Tracking
Support & Ticket Mgmt
Training Management
Invoice Management
Sales Dashboard & Reports

HRMS MODULE

Employee Management
Attendance Management
Leave Management
Document Storage
Performance Tracking
Payroll & Salary + Incentives
Financial Reporting

ADMIN CONTROLS

Dept-Based Navigation
User Roles & Permissions
Secure Authentication
Audit Logs & Data Backup

All 23 modules are natively integrated — no third-party connectors, no data silos, no additional licensing required.

ZOHO ECOSYSTEM ANALYSIS

Zoho Needs 7 Products to Come Close

1. Zoho CRM Enterprise	Covers: Leads, Pipeline, Accounts, Tasks, Sales Reports
2. Zoho Creator	Covers: DRF Management, Versioning, OEM Workflows, Custom PO Logic
3. Zoho Desk	Covers: Support & Ticket Management, Email-to-ticket Automation
4. Zoho Books	Covers: Invoice Management, Payment Tracking, Revenue Reports
5. Zoho Inventory	Covers: Purchase Orders, Installation Tracking, License Mapping (partial)
6. Zoho People	Covers: Employee Mgmt, Attendance, Leave, Documents, Performance
7. Zoho Payroll	Covers: Salary Processing, Incentives, Compliance

ZOHO ONE — FULL BUNDLE ANALYSIS

The Bundle That Still Falls Short

Zoho One — Full Bundle Offering

Zoho bundles all 7 products (CRM, Creator, Desk, Books, Inventory, People, Payroll) into a single subscription called Zoho One, marketed as an all-in-one business OS. While this reduces procurement complexity, it does not eliminate the fundamental workflow gaps specific to engineering distributors.

Critical Gap: Even Zoho One Provides Only Partial Engineering Workflow Coverage

DRF versioning, OEM approval chains, and installation-linked license lifecycle management still require custom development in Zoho Creator — meaning additional developer cost, ongoing maintenance overhead, and no native domain intelligence. Zoho One does not eliminate customization debt for engineering distributors.

ZOHO ONE PRICING

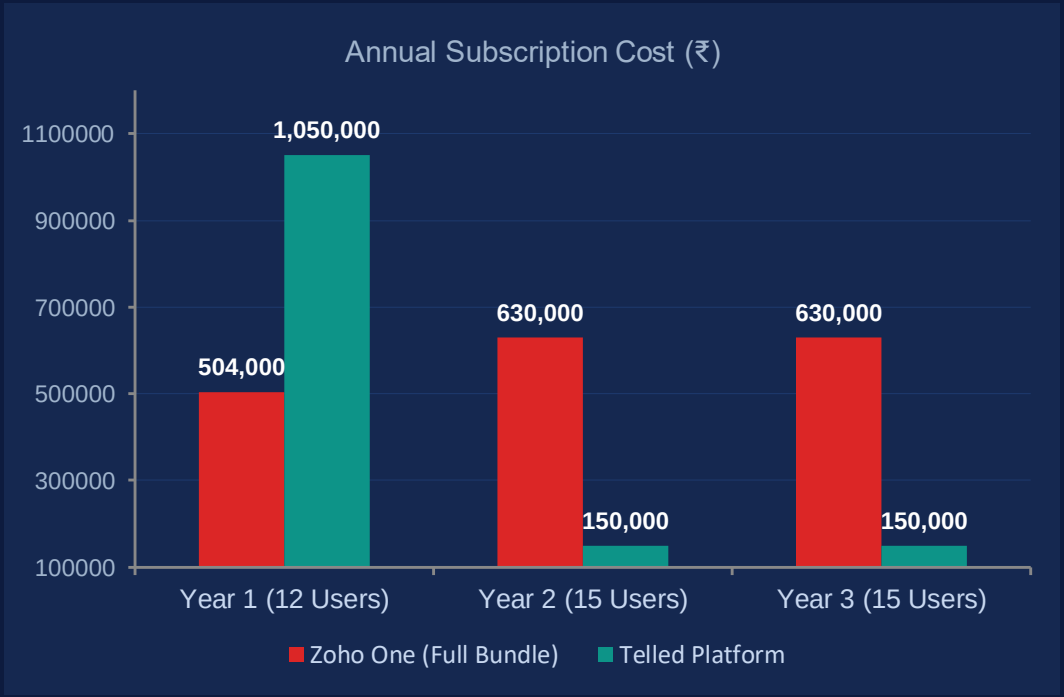
₹3,500 / user / month

Billed annually

12 Users × 12 Months	15 Users × 12 Months	3-Year TCO (avg 14 users)
₹5,04,000 / Year	**₹6,30,000 / Year**	**₹17,64,000 / Year**

FINANCIAL ANALYSIS

3-Year Total Cost of Ownership Comparison



Total 3-Year Zoho Ownership

₹17,64,000/-

3500 x 14 users x 3 yrs

Zaltix 3-year perpetual model

₹13,50,000/-

At 100-user scale

3-year Cumulative Savings

₹4,14,000/-

Final Recommendation

The strategic choice is clear

01

Choose Depth Over Breadth

Zaltix delivers 23 modules purpose-built for your operations. Zoho delivers breadth that demands expensive engineering to achieve depth

02

Optimize total cost of Ownership

Over 3-years, Zaltix's Unified architecture saves over 5-10 lakhs compared to Zoho One – without counting integration development cost.

03

Reduce operational Complexity

One platform, one vendor, one data model eliminates integration risk, training overhead, and the constant threat of cross-product data inconsistencies.

We invite your management team to evaluate Zaltix not as a software subscription, but as a strategic infrastructure investment that grows with your business, eliminates operational friction, and delivers measurable ROI from day one.

Thank You
